

ABSTRACT

A composition is provided that includes an ubiquinone, such as CoQ₁₀, bound by a glycoprotein matrix. A method is also provided for the manufacture of a composition of the invention. The glycoprotein matrix can be formed by permitting
5 the growth of glycoprotein producing bacteria in the presence of the ubiquinone. The composition of the invention provides a method for increasing the stability and bioactivity of the ubiquinone. A method is also provided for administering an ubiquinone to a host by utilizing a composition of the invention.
